Looking Back to the Automat

- 1st appearance in Berlin 1895
- In 1902, Philadelphia-based Joseph Horn and Frank Hardart opened their first Automat named Horn and Hardart
- By the 1950s, Horn and Hardart operated over 100 locations in New York City alone.
 - 800,000 people ate at a Horn and Hardart Automat each day
 - At the time, it was the world's largest restaurant chain.

The Interior of Horn & Hardart's last remaining Automat, on 42nd Street in New York City.

A postcard advertises a Horn and Hardart location on 57th Street in Manhattan.

Horn & Hardart/Wikimedia Commons

By the 1950s, cafeteria-style restaurants with coin-operated vendors like this were all the rage.

Importance of Food Service

- **Food Insecurities**
 - Defined as a lack of consistent access to enough food for an active, healthy lifestyle
 - Prior to COVID-19, roughly 10.5% of US Households or 35 million Americans were food insecure.
 - 30% of all college students experienced food insecurity at one point
 - 38% at two-year college
 - 29% at four-year colleges
- **Having food on campus is important to student success, retention, and persistence**
 - Connectivity
 - Support
 - Going off campus, student may not return and lose out on these opportunities
 - ...[one] study suggest[s] that providing non-academic resources to low-income students may serve to equalize the chances of being retained or persisting

Issues Facing Food Service

- **Serving students/employees after closing hours**
 - Need better food than typical snacks offered in conventional vending machines
- **Post COVID staffing issues**
 - Originally our operations were due to close at 4pm
 - Difficulty in staffing forced a 2pm closure
- **Profitability**
 - Labor costs drive profitability
 - Expectations of prices to be low or even subsidized prevents cost recovery plus margin
 - Even if outsourced, colleges have to subsidize either directly (payment or guaranteed margin) or indirectly (waste, electricity, equipment, maintenance, custodial, etc.)

From This...To....

- Used during COVID and after service hours
- No Staff or Support
- Small and limited selection
- Cash Only...no change back
- Honor System*

**Honor System to a degree, that safe was bolted to the table, if they wanted it, they had to take the table with them as well.*

Also, if someone took without paying it was also under surveillance.

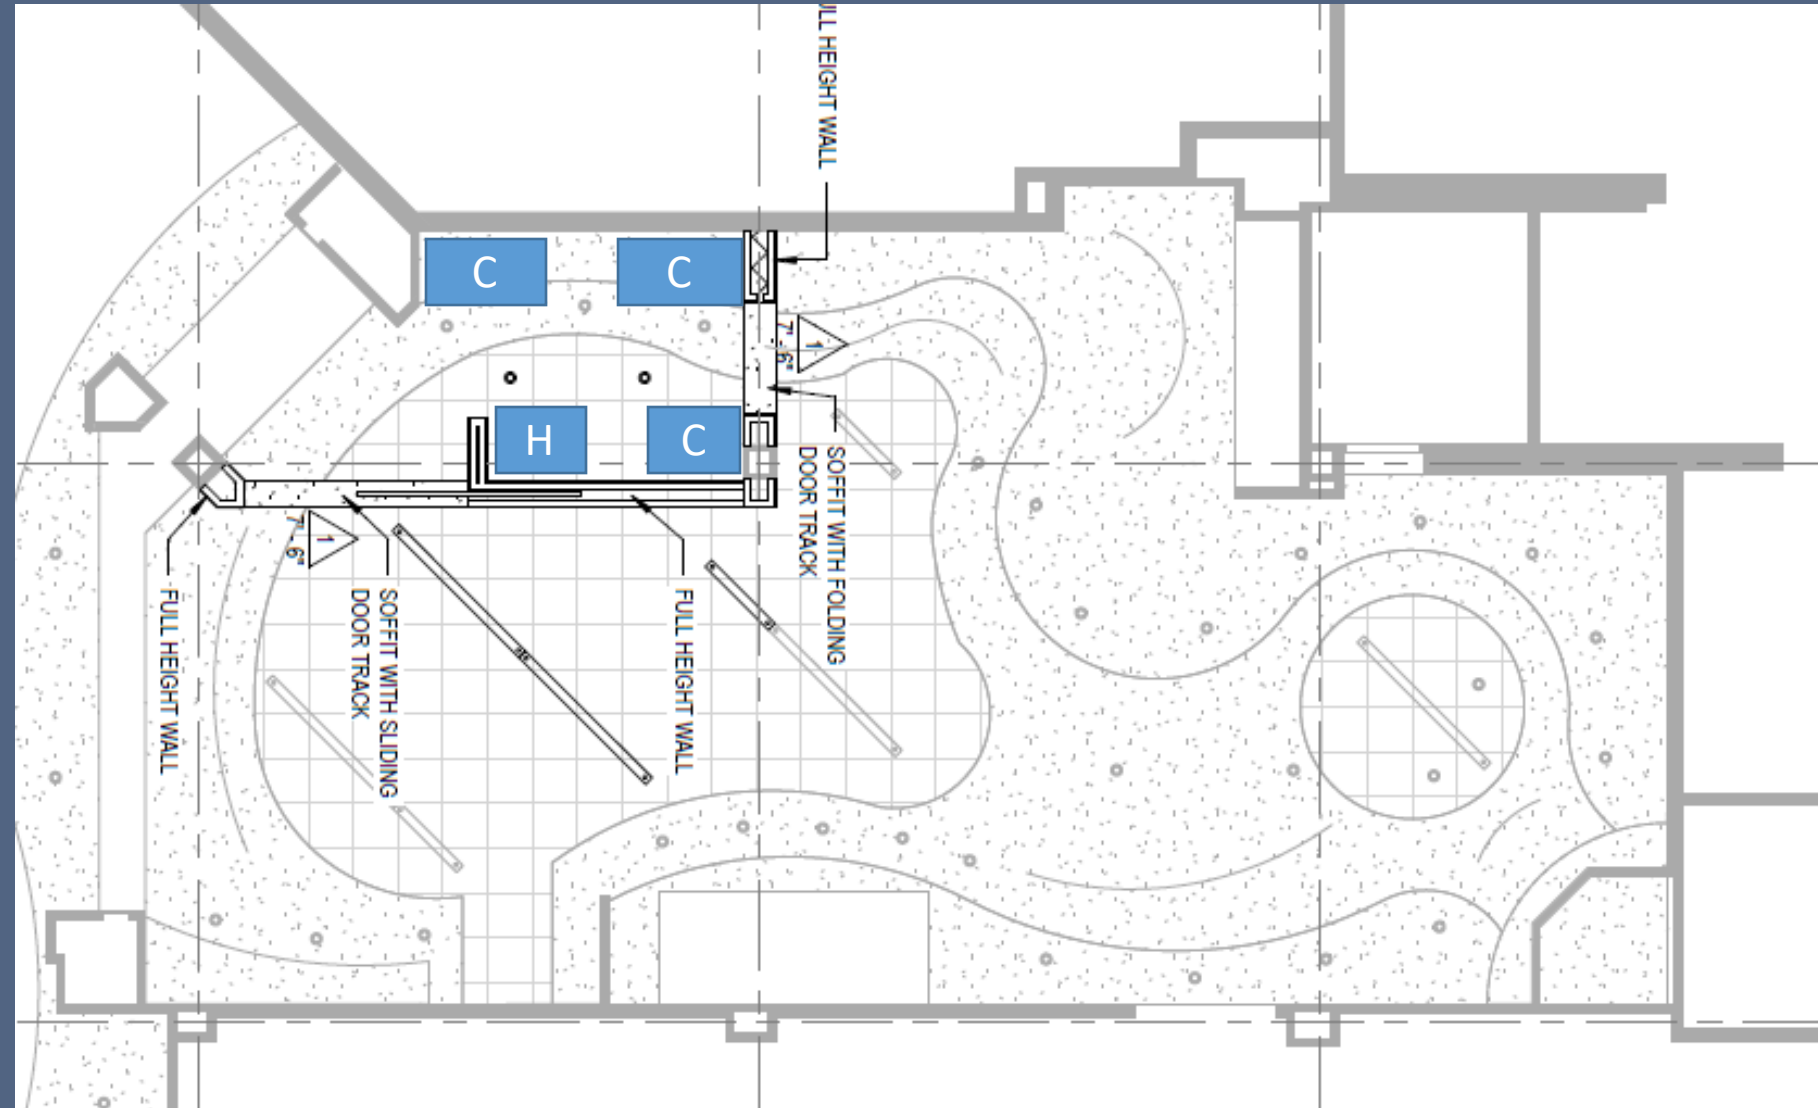

...This

- Open 24/7
- Cold food stocked in morning when café opens and periodically during the day
- Hot food stocked after café closes to extend service
- Designed to service evening campus community
- Take pressure off cashier lines for single items during peak times
- Partnered with DMVI
- Added digital menu boards throughout main café as part of the project

Layout

- Non -structural renovation
- 2 security gates installed
- Minimal footprint
- Used under-utilized café space
- ~\$65k

Cold Machines – Non Entrée Items

- Provides assortments
 - Sandwiches
 - Desserts
 - Salads
 - Yogurts
 - Fruit
 - Humus
 - Etc.
- Other items as long as packaging fits in bay

Entrée Machines (Cold and Hot)

Hot Machine

- Used to provide heated meals ready to eat
- Same or similar entrée's served during café open hours
- Option to shut off vending after certain time (3hrs) to preserve food quality

Cold Machine

- Used to provide refrigerated meals
- Will require heating up via microwave
- Similar entrées as the hot VM if able to be refrigerated and reheated without diminishing food quality
- Will remain operational 24/7 due to refrigeration extending shelf life

Smart Phone Control and Access

- Using a Quick Read (QR) scanning app
- Allows interaction to occur via your smart phone
- Allows for a complete touchless transaction
- Android based VM units

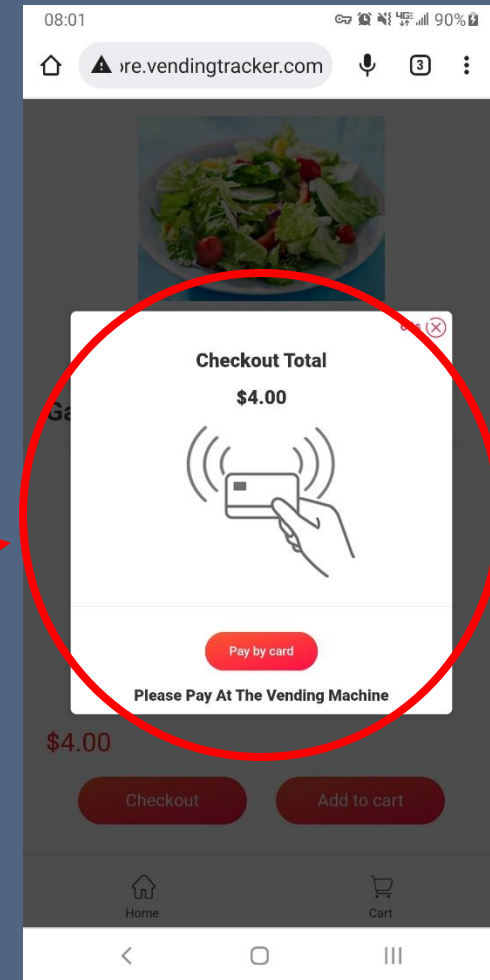

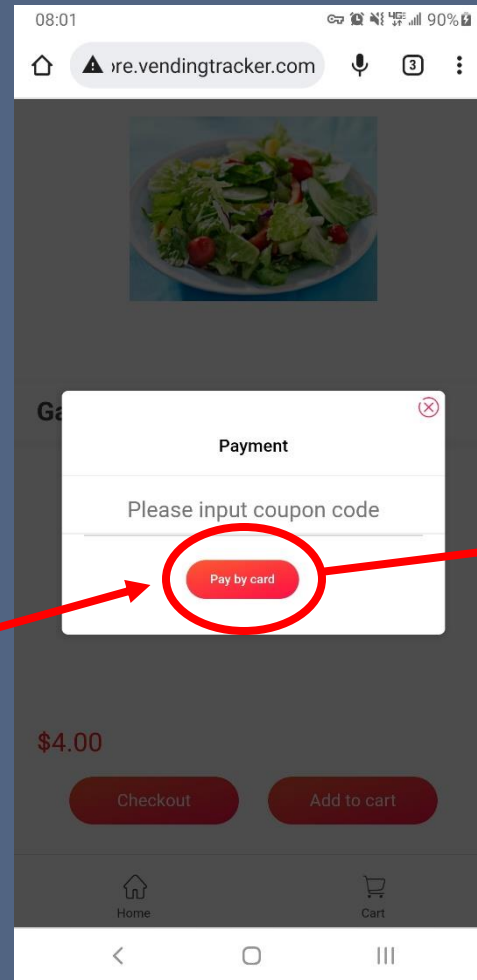

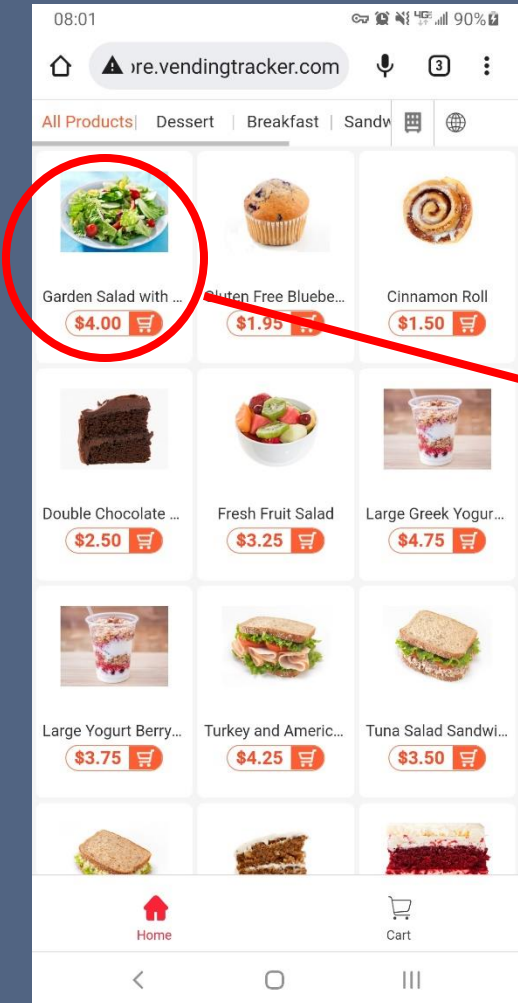

Selection and Payment By Phone

Phone view

Drill Down

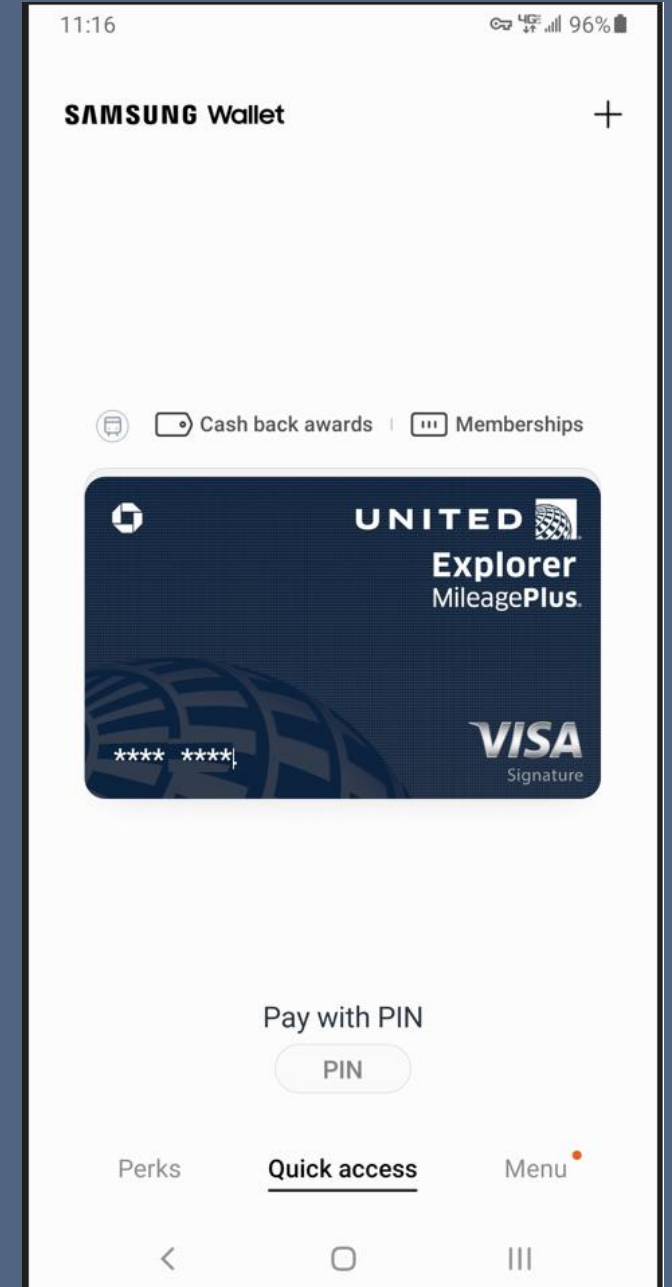

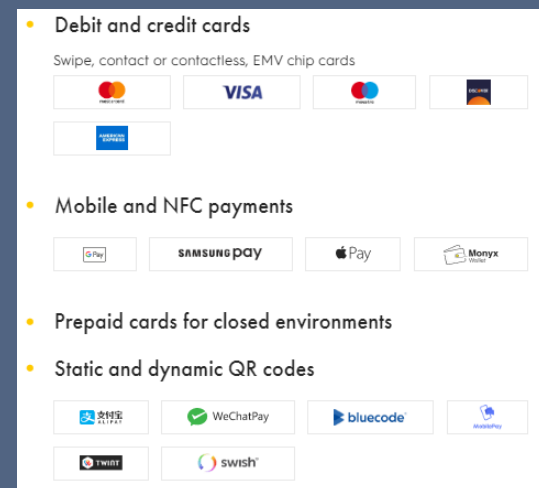

Pay by Card or Coupon

NFC or Card Swipe

Payment Option

- Near Field Connectivity (NFC)
- Electronic Payments Only
 - Smart Card
 - Credit Card
 - Smart Phones
 - E-Wallets
 - NAYAX Prepaid
 - Monyx Wallet
- Cash Not Accepted

Adding Inventory

- Connect keyboard to Android USB
- Press ESC key
- Menu Board displays on VM

Other Advantages of VM/Nayax Systems

- **Advertising**
- **NAYAX Terminal Capabilities**
 - **Increased activity and financial reporting**
 - **NAYAX Mobile phone apps**
 - **Moma (phone access to NAYAX terminals)**
 - **Monyx Wallet (used for refunds, prepaid cards, etc)**
 - **Remote/Instant Refunds**
- **Locker Storage**
 - **Lockers for food**
 - **Lockers for non perishable items**

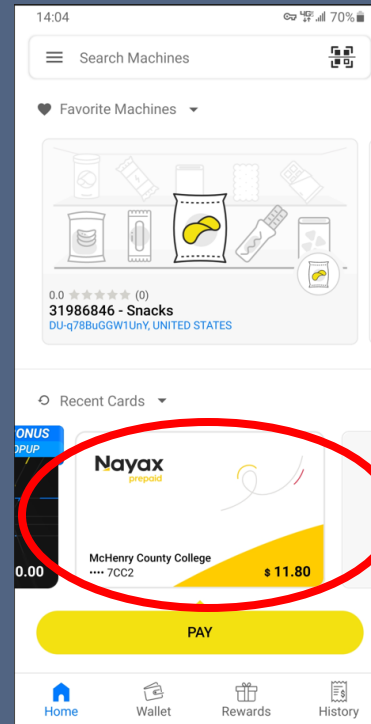

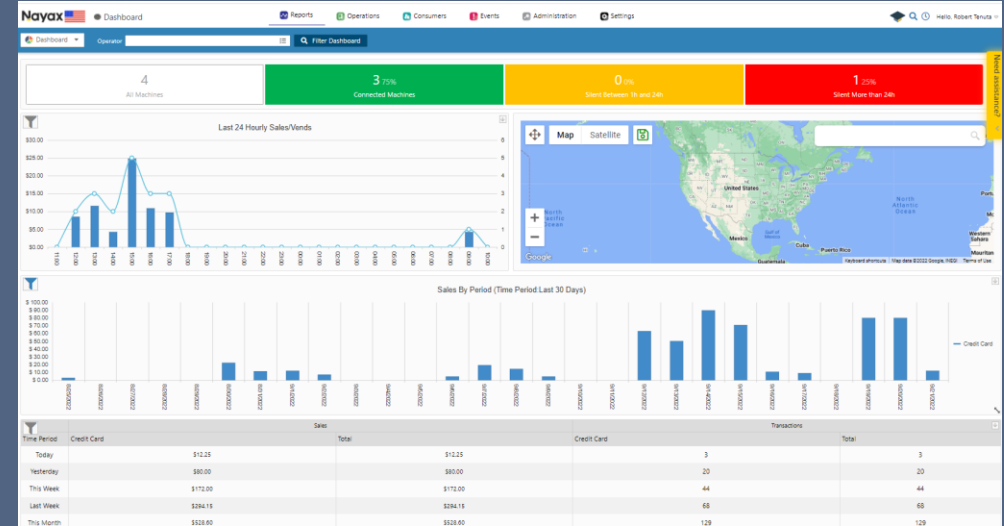

Advertising Capability

- All machines capable of placing advertising in the monitors
- Still Images
- Video & Audio clips
- Multiple images can be loaded and rotated for set times
- Internal promotional use or sell space for local advertising
- Recognize everyone's favorite CFO

Remote Operations

- NAYAX Dashboard
 - NAYAX reporting
 - Multiple reporting options
- Remote refund capability
 - Monyx Card
 - Nayax Prepaid Card
 - Back to the credit card used
- VM Inventory levels
- VM status

Locker Storage Options

- **Online orders**
 - food can be placed in either cold or hot locker for later pickup
 - Code sent to patron to open locker
- **Module lockers can be used for other non perishable item pickup**
 - Bookstore materials after closing hours
 - Board members

Implementation Bugs and Trouble Shooting

- Supply Chain
- Food dispensing properly
- Cell reception/communication
- VM Staying Online
- Business Hours shutoff
- Setting up merchant accounts
- Learning curve of machines
