

IVCC Assesses

Please join the Assessment Committee in saying “**Goodbye!**” to Blackboard—but before you close it out, please remember to record your ILO assessment data. We still need it!

In fact, the Assessment Committee would appreciate it if you would **enter your data earlier** in Blackboard this semester, before your attention shifts to **Brighter** areas of interest!

—We are looking for data on **50%** of your students **before or as** you enter final grades!

THE ART OF ASSESSMENT

Our **brightest** space has been made even brighter with the addition of **Baby Yeardeley** who has joined our co-chair David Garrison's family. Please congratulate him on this excellence when you see him!

If you're having trouble finding a **bright** space for assessment at the end of the semester, the Assessment Committee and CETLA can be that for you and help you get your data in—or your classes transferred to **Brightspace**, the new LMS. We will have walk-in assistance available in CETLA during finals week from

**9 AM until 1 PM each day
from Thursday, May 4th, through Wednesday, May 10th,
with Assessment Committee members or CETLA staff.**

In summary, we are asking you to enter your Assessment data in Blackboard by the time you enter final grades in WebAdvisor. To do this, consult your Assessment Plan or Course Outline for a course you are teaching to make sure you know which ILO/s best apply/ies to your class. Give an assignment to students that will enable you to assess that or those ILOs. Then evaluate students' success on one or more of the ILO criteria and submit that data in Blackboard.

Please repeat for at least half of your students this semester, and then please have a **bright** and **beautiful** break!
