**WHAT IS THE WELLBEING ASSESSMENT?** It's a two-part review of your current overall wellbeing. It includes a simple **biometric screening**. Screenings check your blood pressure and 37 different components of your blood, including cholesterol, blood sugar, kidney, liver and other functions, to give you a complete view of your physical wellbeing. There's also an online **Health & Lifestyle Survey** that asks questions about the physical, emotional, social and financial aspects of your life and what your lifestyle choices mean to your current state of wellbeing.
